### Floor Closer Thresholds/Cover Plate Assemblies

- **Type of Assembly** – Type 11 or 14 for center hung, Type 13 or 15 for offset hung.
- **Materials** – Saddles, floor plates, supports, risers, elevators, and stop strips.
- **Closer to Be Used** – Manufacturer and model number.
- **Net Length** – Jamb-to-jamb. Assembly Types 11, 13 and 14 are cut with center section 1/2” over net length up to 48” and 1” over net length over 48” to allow for fitting on the job. Please specify “net length”, if required. Assembly Type 15 is cut at net length because of factory-cut miters.
- **Handing** – For single doors, specify right or left hand. For pairs of doors, handing is not required.
- **Special Finishes** – Examples include polished, oxidized and oil rubbed, Satin Buff, and PemKote™.

### Special Fasteners
- For center section only. Examples include: MS and ES, FHSL25 and SS/MS & ES.

### Special Fabrication Instructions
- Notching, full miters, etc. Assembly Type 11 is supplied without mitered ends, and assembly Types 13, 14 and 15 are supplied with both ends mitered. Also, when ordering stop strips (shown on page 42), specify door thickness and pivot offset so that the threshold assembly width and pivot dimension can be determined.

### Returns and Allowances
- No merchandise made for special order will be accepted for return or credit.

Floor Plates/Safety Treads

- Pemko can fabricate almost any floor plate threshold you might require.
- Furnished undrilled unless drilling instructions are specified when ordering.
- Ordering of fasteners does not constitute drilling instructions.
- Elevated floor plates require support every 4" on center, at welded seams, and as necessary for support.
- Orders with "x" in the product number (i.e. 195 x 193 x 195) indicate welding.

Available with PemKote™ non-slip coating (see General Information section). Please specify "PemKote™" when ordering. Please furnish drilling instructions when ordering PemKote™ as it is difficult to drill through this coating.
